

AARTI HARIHARNO

Full Stack Software Engineer | .NET Core • Angular • Cloud & Microservices

Jabalpur, MP, India • +91 7879038538 • aarti31h@gmail.com • linkedin.com/in/aartih31

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5 years of experience designing, building, and supporting scalable web applications and distributed systems using **ASP.NET Core (.NET 8), C#, Angular and TypeScript**. Strong in microservices (CQRS, MediatR), secure REST APIs (JWT, OAuth2, OpenID Connect), and messaging with RabbitMQ and Azure Service Bus. Hands-on with Azure, AWS, Docker and CI/CD (Azure DevOps, GitHub Actions), with a proven record in production support, performance optimization, and system design.

CORE COMPETENCIES

Microservices & System Design • REST API Development • API Security (JWT, OAuth2, OIDC) • CQRS & MediatR • Performance Optimization & Caching • CI/CD & DevOps • Production Support & Monitoring • Unit / Integration Testing • SOLID & Design Patterns • Agile / Scrum

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript (ES6+), RxJS, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: C#, ASP.NET Core / .NET 8, Entity Framework Core, LINQ, REST APIs, SignalR, MediatR, Background Services, Swagger

Databases, Caching & Messaging: SQL Server, PostgreSQL, MongoDB, Redis, RabbitMQ, Azure Service Bus

Cloud & DevOps: Azure (App Service, VMs, Service Bus), AWS (EC2, S3, CloudFront, IAM, Route 53), Docker, Helm, Azure DevOps, GitHub Actions, Linux, Git, GitHub

Security & Observability: JWT, OAuth2, OpenID Connect, IdentityServer, Serilog, NLog, Grafana, Prometheus

PROFESSIONAL EXPERIENCE

Software Engineer — Logimonk Technologies Pvt Ltd, Jabalpur, India

Jul 2021 – Present

- Designed and delivered full-stack products across real estate, fintech, e-commerce, and video streaming domains using Angular, TypeScript, ASP.NET Core, and SQL Server/PostgreSQL, serving 20K+ daily requests.
- Architected microservices with CQRS and MediatR, decoupling services via RabbitMQ and Azure Service Bus, which improved release independence and cut cross-team deployment conflicts by ~40%.
- Built secure REST APIs with JWT authentication and OAuth2 / OpenID Connect (IdentityServer), and documented them with Swagger, standardizing auth across 4+ client applications.
- Reduced average API response time by ~35% through Redis caching, EF Core / LINQ query tuning, pagination, and database indexing on SQL Server and PostgreSQL.
- Containerized services with Docker and automated build–test–deploy pipelines in Azure DevOps and GitHub Actions, cutting deployment time by ~40% and eliminating manual release steps.
- Owned production support: implemented structured logging (Serilog) and monitoring dashboards (Grafana, Prometheus), reducing recurring production incidents by ~30% and improving MTTR.
- Introduced unit and integration testing (xUnit) and code reviews, raising coverage on core services to 80%+; led client requirement workshops and sprint demos in Agile/Scrum teams.

MAJOR PROJECTS

Investment & Property Management Platform (Fintech / Real Estate)

Apr 2022 – Present

Stack: Angular (Material), ASP.NET Core Web API, EF Core, SQL Server, PostgreSQL, Azure Service Bus, Redis, Docker, Azure DevOps

- Solved fragmented investor/advisor workflows by engineering a single sign-on (SSO) platform unifying Admin, Advisor, Investor, and Acquisition modules, cutting duplicate logins and support tickets.
- Designed finance microservices (subscriptions, payments, goal tracking) using CQRS + MediatR with REST and message-bus integration, enabling independent scaling of high-load services.
- Integrated an AI-powered chatbot for investment and subscription queries, deflecting ~25% of routine support requests and improving user engagement.

Subscription-Based Video Streaming Platform

May 2024 – Nov 2024

Stack: Angular (Ant Design), ASP.NET Core, SignalR, pub/sub messaging, EF Core, SQL Server

- Built real-time playback status and notifications with SignalR and pub/sub messaging, reducing content-delivery latency and supporting concurrent global streaming and uploads.
- Developed a responsive Angular frontend and subscription-based access control, improving stream start-up experience and user retention on high-traffic days.

Customer-Centric E-Commerce Platform

Sep 2021 – Mar 2022

Stack: Angular (Material), ASP.NET Core Web API, EF Core, SQL Server, Stripe, Google Maps API

- Delivered secure checkout with Stripe, live order tracking via Google Maps API, and delivery management through Bring, improving order-to-delivery visibility for customers.
- Optimized product search, order placement, and payment tracking flows, improving page responsiveness and reducing checkout drop-offs.

EDUCATION

MCA (Master of Computer Applications) — Gyan Ganga College of Technologies, Jabalpur

2019 – 2021
